U.S. Patent and Trademark Office PTOL-303 (Rev. 08-06)

Continuation of 11, does NOT place the application in condition for allowance because: With regard to the 112 rejections, the discussion regarding trace amounts in the specification does not refer to lithium oxide or to any general component but refers to the amount of thanium oxide which maybe present as an impurity. With regard to the art rejection, Lewis clearly teaches that the amount of lithium oxide can be zero to nine percent which meets the values claimed. Lewis does not have to present examples of every value of every range in order to disclose or teach the range.
